Summary

Software Engineer with experience in full-stack web development, specializing in React.js, Python, Django, Node Js, REST APIs, SQL, and Machine Learning. Seeking to contribute technical expertise and problem-solving skills to build scalable, high-quality software solutions.

Technical Skills

Programming Languages: Python, JavaScript, SQL, Java, C

Web Frameworks & Technologies: React.js, Tailwind CSS, Django, Node Js, REST APIs, HTML5, CSS3

Databases: MySQL, PostgreSQL

Developer Tools: Git, GitHub, Postman

Cloud: AWS, Nginx

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming, Machine Learning

Soft Skills: Problem-Solving, Team Collaboration, Communication, Adaptability, Quick Learner, Mentorship

Experience

Software Engineer & Technical Trainer

November 2025 – Present

PiBots Robotics Pvt. Ltd.

Hybrid

- Contributed to the development and enhancement of 4+ business applications, including CRM, LMS, e-commerce, and branding platforms.
- Collaborated with cross-functional teams to deliver 10+ production-ready features across multiple client applications, supporting the complete software development lifecycle.
- Conducted technical training for 100+ college students and interns in full-stack software development, enabling them to build real-world applications using AI-powered development tools and modern engineering practices.

Projects

Machine Flow- PMS | GitHub Repo

May 2026 – July 2026

- Developed a full-stack Project Management System with project, sub-project, task, meeting, client, and report management.
- Implemented real-time collaboration, offline support, global search, Google Calendar/Tasks synchronization, and a secure client portal with role-based access control for seamless project coordination.
- Implemented real-time collaboration, offline support, global search, and AI-assisted report generation.
- Built enterprise-grade features including audit logs, soft-delete and recovery, secure authentication, CSRF protection, encrypted data handling, and comprehensive access control to ensure security and reliability.

Expert System – A No-Code Machine Learning Platform | GitHub Repo

July 2025 – November 2025

- Designed and developed a no-code machine learning platform enabling users to build, generate, and evaluate ML models through an intuitive web interface.
- Automated the complete machine learning workflow, including data preprocessing, feature engineering, visualization, model evaluation, and performance analysis.
- Integrated 13 machine learning algorithms for classification, regression, and clustering, allowing users to compare model performance and select the best-performing solution.
- Enabled users to download trained machine learning models in .pkl format for seamless integration into external applications and real-world deployment.

Education

Master of Computer Applications

2024 – 2026

College of Engineering, Vadakara

B.Sc. Information Technology

2021 – 2024

University of Calicut

CGPA: 8.2

Awards & Certifications

- Database Management System – Indian Institute of Technology, Kharagpur (NPTEL)
- Co-authored a Springer conference paper titled “*Advanced Speech Emotion Recognition in Malayalam Accented Speech*”, published in Springer CCIS (AIST 2023), analyzing supervised and unsupervised approaches.
