Summary

Full-Stack Software Engineer with hands-on experience building production web applications using React, Node.js, Django, and REST APIs. Skilled in end-to-end development from database design (MySQL/PostgreSQL) to deployment (AWS, Nginx) with a strong foundation in Machine Learning and Data Structures & Algorithms. Proven track record of delivering enterprise features in production systems.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, Java, C, SQL
- **Frameworks & Libraries:** React JS, Node.js, Express, Tailwind CSS, Vue.js, Django, HTML5, CSS3
- **Databases & ORM:** PostgreSQL, MySQL, MongoDB, Prisma
- **Cloud & DevOps:** AWS (EC2, S3, Lambda), CI/CD, GitHub Actions, Nginx
- **Tools & Technologies:** Git, REST APIs, GraphQL, Microservices, Agile/Scrum, Postman
- **Machine Learning:** Classification, Scikit-learn, Pandas, NumPy, Matplotlib, Data Preprocessing, Feature Engineering
- **Core CS Concepts:** Data Structures & Algorithms, Object-Oriented Programming
- **Soft Skills:** Problem-Solving, Team Collaboration, Communication, Mentorship

Experience

Software Engineer

August 2025 – Present

PiBots Robotics Pvt. Ltd.

Malappuram, Kerala

- Architected and deployed 4+ full-stack applications, including CRM, LMS, e-commerce, and branding platforms, using React JS, Node.js, Django, REST APIs, and PostgreSQL, serving 10+ enterprise clients.
- Delivered 10+ production-ready features across the full SDLC (requirements analysis, development, deployment, post-release support) in collaboration with cross-functional teams to meet project deadlines.
- Optimized database queries and implemented caching strategies, reducing API response time from 800ms to 150ms
- Trained 100+ students and interns in full-stack development using AI-powered tools and modern engineering practices.

KEY PROJECTS

Expert System | *Python, Django, JavaScript, Tailwind CSS, Scikit-learn, Pandas* | [GitHub](#) July 2025 - December 2025

- Designed and built a no-code ML platform spanning the full pipeline: data upload, preprocessing, training, prediction, and evaluation, enabling 10+ non-technical users to build models without writing code.
- Integrated 13 ML algorithms across classification, regression, and clustering, achieving up to 81% model accuracy through configurable hyperparameter tuning.
- Generated real-time evaluation metrics (Accuracy, F1, RMSE, Silhouette Score) and interactive visualizations (heatmaps, cluster plots) via D3.js, with trained models exported as .pkl files used in 10+ deployments.

Machine Flow - PMS | *React JS, TypeScript, Fastify, Prisma, PostgreSQL* | [GitHub](#)

May 2026 - July 2026

- Engineered a full-stack project management platform with hierarchical project → sub-project → task tracking, supporting 5+ concurrent projects and 12+ team members.
- Established a real-time, offline-first sync layer (Supabase Realtime over SSE) with optimistic UI updates and queued mutation replay, cutting perceived sync latency by 85% and preventing data loss during network interruptions.
- Streamlined scheduling and data security with bidirectional Google Calendar sync, a role-scoped client portal (CSRF protection, encrypted tokens), and a full audit trail with 30-day recovery, saving 5 hours/week and ensuring zero permanent data loss.

EDUCATION

College of Engineering Vadakara

Aug 2024 – April 2026

Master of Computer Applications, CGPA: 9.21/10.0

Vadakara, Kozhikode

University of Calicut

June 2021 – March 2024

B.Sc. Computer Science, CGPA: 8.4

Areekode, Malappuram

CERTIFICATIONS & ACHIEVEMENTS

- Database Management System (Elite, 72%) – NPTEL, IIT Kharagpur — Jul-Sep 2025
- Co-authored a **Springer conference paper** titled "Advanced Speech Emotion Recognition in Malayalam Accented Speech", published in **Springer CCIS (AIST 2023)**, analyzing supervised and unsupervised approaches.
